“shield”, 2017

Materials: yellow gold 18 kt, silver 925/000, copper and white enamel

Giorgio Chiarcos devoted himself, as a creative and autonomous artist, to the creation of contemporary jewels.

He continues creating unique pieces, looking into the most unaccustomed decorative effects in shape and material, alternating harmonies and contrasts, mixing precious refinement and rough essentiality.

He is inspired by elements such as nature and recycle of materials.

He developed a signature style based on the playful use of different materials, combined with gold and silver, rubber, porcelain, enamel, iron and steel.

Since 1996 his jewels have been exhibited in several art galleries and contemporary jewellery studios .
